David L. Successfully Brings In 2016 With A Soon-To-Be Classic For His Diehard Readers!

Suspense Novel Cleverly Details Just How Far One Would Go To Exact Revenge On Their Perpetrator!

March 2016 – A Recipe 4 Revenge (Total Package Publications, LLC, 2016, ISBN 978-0-9789276-9-1) by David L. is an action & suspense novel that illustrates the lives of four very different women at various stages of their lives and chronicles their perspective on how they have been individually tormented and sexually abused by an individual from high school. At their ten year high school reunion, past secrets are uncovered about one another and egos are put to a test as each individual quickly come to the realization that their lives are intertwined in more ways than they could ever imagine. Do they allow their discoveries of one another to continue to dictate their fate? Are they able to set aside personal vendettas with a common enemy long enough to retaliate accordingly? These are just a few of the questions that must be answered before their perpetrator becomes aware of whom they are and become the antagonist!

Through the course of crafting this story, David L.'s primary intention was, and still is to both capture and more importantly educate the masses to the historically under-reported prevalence of underage females being unjustly taken advantage of from individuals lurking in the shadows and walking the earth ready to prey on them. Many of our own sisters and daughters are right now carrying the shame of being an unfortunate victim of a sexual assault on their weighted shoulders, and even more significant, that shame is poisoning their outlook on future relationships, child-rearing and how they see the world.

"I am obviously not a woman who has been through such a heinous crime such as sexual assault but I can to the best of my ability emphasize with their torment," says David L. while crafting his novel. "My primary objective was to show the masses the plight of the underage female and the unfortunate circumstances that can come from being a victim of a sexual assault from such an early age."
